Foreword

THE CONCERN of the Office of Education for library development dates back to 1870, when the first statistical surveys appeared under the title *Statistics of Public, Society, and School Libraries.*

During the 1930's a new pattern of library statistics resulted in separate publications on public, college and university, and public school libraries. The first comprehensive college and university library survey covered 1939–40 and was followed by studies for 1946–47, 1951–52, and 1956–57.

In the fall of 1959 a new annual series of statistical surveys of libraries in institutions of higher education was initiated by Frank L. Schick of the Office of Education with the cooperation of Hazel B. Timmerman and Richard Harwell, then staff members of the American Library Association. At meetings of representatives of the Office of Education's Library Services Branch and the Statistics Coordinating and College and University Library Statistics Committees of the American Library Association, plans were developed for publishing the results of the surveys in two separate parts: *Part I, Institutional Data;* and *Part II, Analytic Report.*

The present publication provides, for the first time, an analytic summary of management and salary data on libraries of higher education institutions, by type of institution and control and by enrollment size and control. The status picture of these libraries thus presented should assist the educational and other authorities concerned with administering and developing the libraries.

The Office of Education acknowledges with thanks the cooperation by librarians and administrators of higher education institutions in supplying the data for the new series of statistical surveys on the libraries of these institutions.

RALPH C. M. FLYNT,
Associate Commissioner, Bureau of Educational Research and Development.

JOHN G. LORENZ, *Director,*
Library Services Branch.

TEXT TABLES

A. Summary of management data for libraries of 1,951 higher education institutions: 1959–60	2
B. Median number of volumes and professional staff, and median operating expenditures, in libraries of 4-year institutions, by type of institution: 1959–60	3
C. Median number of volumes and professional staff, and median operating expenditures, in libraries of 4-year institutions, by size of enrollment: 1959–60	3
D. Median number of volumes and professional staff, and median operating expenditures, in libraries of 2-year institutions, by size of enrollment: 1959–60	3
E. Total number of private institutions and number in which all or part of the library staff personally receive no financial remuneration for services, by type of institution and size of enrollment: 1959–60	5
F. Number of responses received from libraries in 1,951 institutions of higher education, by type of institution and control: 1959–60	6
G. Number of responses received from libraries in 1,951 institutions of higher education, by size of enrollment and control: 1959–60	6

BASIC TABLES

Management Data

1. Volumes, personnel, and operating expenditures of university libraries in the aggregate United States, by control: 1959–60	8
2. Volumes, personnel, and operating expenditures of liberal arts college libraries in the aggregate United States, by control: 1959–60	8
3. Volumes, personnel, and operating expenditures of teachers college libraries in the aggregate United States, by control: 1959–60	9
4. Volumes, personnel, and operating expenditures of technological school libraries in the aggregate United States, by control: 1959–60	9
5. Volumes, personnel, and operating expenditures of theological school libraries in the aggregate United States: 1959–60	10
6. Volumes, personnel, and operating expenditures of other professional school libraries in the aggregate United States, by control: 1959–60	10
7. Volumes, personnel, and operating expenditures of junior college libraries in the aggregate United States, by control: 1959–60	11
8. Volumes, personnel, and operating expenditures of libraries in 4-year institutions of higher education with enrollments of less than 500 in the aggregate United States, by control: 1959–60	11
9. Volumes, personnel, and operating expenditures of libraries in 4-year institutions of higher education with enrollments of 500–999 in the aggregate United States, by control: 1959–60	12

Page

10. Volumes, personnel, and operating expenditures of libraries in 4-year institutions of higher education with enrollments of 1,000–2,499 in the aggregate United States, by control: 1959–60 12
11. Volumes, personnel, and operating expenditures of libraries in 4-year institutions of higher education with enrollments of 2,500–4,999 in the aggregate United States, by control: 1959–60 13
12. Volumes, personnel, and operating expenditures of libraries in 4-year institutions of higher education with enrollments of 5,000–9,999 in the aggregate United States, by control: 1959–60 13
13. Volumes, personnel, and operating expenditures of libraries in 4-year institutions of higher education with enrollments of 10,000 or more in the aggregate United States, by control: 1959–60 14
14. Volumes, personnel, and operating expenditures of libraries in 2-year institutions of higher education with enrollments of less than 500 in the aggregate United States, by control: 1959–60 14
15. Volumes, personnel, and operating expenditures of libraries in 2-year institutions of higher education with enrollments of 500–999 in the aggregate United States, by control: 1959–60 15
16. Volumes, personnel, and operating expenditures of libraries in 2-year institutions of higher education with enrollments of 1,000–2,499 in the aggregate United States, by control: 1959–60 15
17. Volumes, personnel, and operating expenditures of libraries in public 2-year institutions of higher education with enrollments of 2,500 or more in the aggregate United States: 1959–60 16

Salary Data

18. Number of 11–12 month library positions reported by institutions of higher education in the aggregate United States, by type of position, type of institution, and control: 1959–60 16
19. Number of 9–10 month library positions reported by institutions of higher education in the aggregate United States, by type of position, type of institution, and control: 1959–60 17
20. Range and median for 11–12 month salary of chief librarian or library director in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 17
21. Range and median for high 11–12 month salary of associate or assistant librarians in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 18
22. Range and median for high 11–12 month salary of department and division heads in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 18
23. Range and median for high 11–12 month salary of heads of school, college, or departmental libraries in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 19
24. Range and median for high 11–12 month salary of all other professional assistants in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 19
25. Range and median for high 11–12 month salary of all nonprofessional assistants in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 19
26. Range and median for 9–10 month salary of chief librarian or library director in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 20

Page

27. Range and median for high 9–10 month salary of associate or assistant librarians in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 20
28. Range and median for high 9–10 month salary of department and division heads in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 20
29. Range and median for high 9–10 month salary of heads of school, college, or departmental libraries in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 21
30. Range and median for high 9–10 month salary of all other professional assistants in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 21
31. Range and median for high 9–10 month salary of all nonprofessional assistants in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 21
32. Range, quartile, and median of high 11–12 month library salary in universities in the aggregate United States, by control and type of position: 1959–60 22
33. Range, quartile, and median of high 11–12 month library salary in liberal arts colleges in the aggregate United States, by control and type of position: 1959–60 22
34. Range, quartile, and median of high 11–12 month library salary in teachers colleges in the aggregate United States, by control and type of position: 1959–60 22
35. Range, quartile, and median of high 11–12 month library salary in technological schools in the aggregate United States, by control and type of position: 1959–60 23
36. Range, quartile, and median of high 11–12 month library salary in 125 theological schools in the aggregate United States, by type of position: 1959–60 23
37. Range, quartile, and median of high 11–12 month library salary in other professional schools in the aggregate United States, by control and type of position: 1959–60 23
38. Range, quartile, and median of high 11–12 month library salary in junior colleges in the aggregate United States, by control and type of position: 1959–60 24
39. Range, quartile, and median of high 9–10 month library salary in liberal arts colleges in the aggregate United States, by control and type of position: 1959–60 24
40. Range, quartile, and median of high 9–10 month library salary in 49 publicly controlled teachers colleges in the aggregate United States, by control and type of position: 1959–60 24
41. Range and median of high 9–10 month library salary in 3 publicly controlled technological schools in the aggregate United States, by control and type of position: 1959–60 25
42. Range, quartile, and median of high 9–10 month library salary in 15 theological schools in the aggregate United States, by type of position: 1959–60 25
43. Range and median of high 9–10 month library salary in other professional schools in the aggregate United States, by control and type of position: 1959–60 25
44. Range, quartile, and median of high 9–10 month library salary in junior colleges in the aggregate United States, by control and type of position: 1959–60 26

78. Range, quartile, and median of high 9–10 month library salary in 2-year institutions of higher education in the aggregate United States, with enrollments of less than 500, by control and type of position: 1959–60 39
79. Range, quartile, and median of high 9–10 month library salary in 2-year institutions of higher education in the aggregate United States with enrollments of 500–999, by control and type of position: 1959–60 39
80. Range, quartile, and median of high 9–10 month library salary in 2-year institutions of higher education in the aggregate United States with enrollments of 1,000–2,499, by control and type of position: 1959–60 40
81. Range, quartile, and median of high 9–10 month library salary in 20 publicly controlled 2-year institutions of higher education in the aggregate United States with enrollments of 2,500 or more, by type of position: 1959–60 40
82. Range and median for beginning 11–12 month salary of library school graduates without experience in institutions of higher education in the aggregate United States, by type of institution and control: 1959–60 40
83. Range and median for beginning 9–10 month salary of library school graduates without experience in institutions of higher education in the United States, by type of institution and control: 1959–60 41
84. Range and median for beginning 11–12 month salary of library school graduates without experience in 4-year institutions of higher education in the aggregate United States, by size of enrollment and control: 1959–60 41
85. Range and median for beginning 9–10 month salary of library school graduates without experience in 4-year institutions of higher education in the aggregate United States, by size of enrollment and control: 1959–60 41
86. Range and median for beginning 11–12 month salary of library school graduates without experience in 2-year institutions of higher education in the aggregate United States, by size of enrollment and control: 1959–60 42
87. Range and median for beginning 9–10 month salary of library school graduates without experience in 2-year institutions of higher education in the aggregate United States, by size of enrollment and control: 1959–60 42

Library Statistics of Colleges and Universities, 1959-60

Part 2: Analytic Report

DATA for 1959–60 on individual libraries of higher educational institutions have been presented in *Library Statistics of Colleges and Universities, 1959–60, Part I: Institutional Data.*[1] The present analytic publication provides the same data arranged by type of institution and control, by size of enrollment and control, and by salaries for individual library positions. This arrangement makes it possible to compare a specific library in a given group with all others of that group from which data were received. The basic data appear in two groups of tables (those pertaining to management and those pertaining to salary) that follow the text portion of this publication. These data were derived from a questionnaire (see appendix) and related correspondence.

Coverage

A copy of the questionnaire was mailed to 1,952 institutions of higher education in the aggregate United States (including the Canal Zone, Guam, and Puerto Rico).[2] Usable reports were received from 1,854 of the institutions—a response rate of 95 percent. These institutions represented 98 percent of the total enrollment in all the institutions queried. For the 97 institutions that did not reply, data concerning 5 management items[3] were estimated on the basis of relevant statistics found in various sources of information on higher education institutions. The estimates are considered sufficiently reliable for analysis since, from the evidence gathered, virtually all of these 97 are in the lowest quarter of their respective groups for each of the 5 management items.

A breakdown of the number of responses received by type of institution and size of enrollment is provided in tables F and G. Data for volumes and personnel appearing in the management data tables are for a total of 1,951[4] institutions. Total operating expenditures have been excluded for libraries (all in private institutions) in which all or part of the staff receive no financial remuneration for their services, since the budget pattern of these libraries is not comparable with that of the majority of the institutions being considered. Table E gives the total number of private institutions and the number in which such a situation prevails.

Of the 1,854 reports received, only 1,792 libraries (91.8 percent of the 1,952 institutions queried) answered the questions pertaining to salaries for individual library positions.

Classification of Data

To aid in the analysis of library trends, all data are arranged in groups, first according

1 By John Carson Rather *and* Doris C. Holladay. U. S. Department of Health, Education, and Welfare. Washington: U.S. Government Printing Office, 1961. (OE–15023) 79 p.

2 As listed in *Opening (Fall) Enrollment in Higher Education, 1959: Institutional Data.* Washington, U.S. Government Printing Office, 1959. (OE–54003)

3 Volumes at end of the year, total personnel, professional personnel, nonprofessional personnel, and total operating expenditures.

4 Includes 2- or 3-year technical institutes and semiprofessional schools if their programs consist primarily of courses creditable toward a bachelor's degree. The total of 1,951 (which differs slightly from the total given in other Office of Education publications) results from the fact that for various reasons the present publication considers the libraries of certain institutions as being separate libraries, and the libraries of others as being combined.

to type of institution, then by size of enrollment. The classification by type comprises seven categories, defined as follows:

University.—Stresses graduate education, confers advanced degrees as well as bachelor's degrees in several liberal arts fields, and has at least two professional schools that are not exclusively technological.

Liberal arts college.—Places its primary emphasis on general undergraduate education.

Teachers college.—Concerns itself principally with the training of teachers.

Technological school.—Provides training largely in technology and the physical sciences.

Theological school.—Devotes itself to programs in theology, religion, and religious education.

Other professional schools.—Give programs directed to one or more fields of specialization, such as medicine, law, business, pharmacy, etc.

Junior college.—Offers at least 2 but fewer than 4 years of work and does not grant a bachelor's degree or equivalent recognition.

In the tables arranged by size of enrollment, the 4-year institutions are shown separately from the 2-year ones and the public schools separately from the private ones.

Wherever data are sufficient, first- and third-quartile points are shown in addition to the median, highest, and lowest actual figures reported by any institution. The median was chosen in preference to the arithmetic mean because the median is not affected by extreme values. The first-quartile point (or the 25th percentile) is a value above which fall 75 percent and below which fall 25 percent of all libraries in the group; the median, a value above and below which fall half the cases; and the third-quartile point (or 75th percentile), a value above which fall 25 and below which fall 75 percent of the cases.

A summary of all management data is shown in table A. In 1959–60 the libraries in the higher education institutions housed 176,721,000 volumes, added 8,415,000 volumes, and had staffs of approximately 9,000 professionally trained librarians and 9,000 nonprofessional personnel. Exclusive of the estimated value of services for which the staff [5] rendering these services personally received no financial remuneration, salaries represented 61 percent of the total operating expenditures.

[5] Members of religious orders.

Table A.—Summary of management data for libraries of 1,951 higher education institutions: 1959-60

Item	Number of institutions	Total (in thousands)
Collection		
Volumes on hand	1,951	176,721
Volumes added	1,951	8,415
Periodicals received	1,951	1,271
Personnel		
Total personnel [1]	1,951	18
Professional staff [1]	1,951	9
Nonprofessional staff [1]	1,951	9
Hours of student assistance	1,951	12,062
Operating Expenditures		
Total	[2] 1,695	$137,245
Salaries and wages	[2] 1,695	84,175
Books and other library materials	1,951	40,760
Binding	1,951	4,852
Other	1,951	7,458

[2] Excludes libraries in which all or part of the staff personally receive no financial remuneration for their services.

When data for the academic libraries are grouped by type of institution, wide ranges in the highest and lowest figures reported by any institution may be seen. An example is the size of collection: 6,697,100 in a large private university and 500 in a technological school. The median figure in size of collection, however, ranges from a high of 450,000 in private universities to a low of 8,700 in public junior colleges. During 1959–60 the 59 private universities added a median of 21,500 volumes, and 81 privately controlled professional schools added a median of 500 volumes. The median expenditure ratio ranges from 7.1 percent for the theological schools to 1.9 percent for the technological schools.

The figures when grouped by size of enrollment show much more comparability. The expenditure ratio for both public and private institutions with enrollments of 10,000 or more is 3.2 percent. In both public and private institutions with an enrollment under 500, the ratio is 4.7 percent. Median number of volumes, professional staff, and operating expenditures in 4-year institutions by type of institution may

Table B.—Median number of volumes and professional staff, and median operating expenditures, in libraries of 4-year institutions, by type of institution: 1959-60

[1] In full-time equivalents.

be seen in table B. These same items have also been distributed by size of enrollment in 4-year and 2-year institutions in tables C and D.

The individual salary tables are based on the 1,792 libraries which answered the questions pertaining to the various types of library positions.

A total of 337 libraries in the institutions circularized pay salaries for a 9–10 month period of employment; these salaries are set forth separately from the 11–12 month salaries. The figures are for salaries actually paid. As mentioned above, in some private institutions, however, part or all of the staff do not personally receive financial remuneration.

For many libraries, the chief librarian's salary was the only one reported. This fact leads to the possible assumption that the libraries in question are one-man operations. For others, the chief librarian's salary was the only one *not* reported. It cannot be assumed, however, that the position of chief librarian does not exist if no salary was reported. On the other hand, a special study shows that, when data were reported for some positions but not for others (except in the case of chief librarian), the omitted positions did not exist. Thus, the tables can contribute not only to an understanding of the salary picture in the libraries of higher education institutions, but also to the outlining of organizational patterns within these institutions, with attendant implications as to the status of the library staff (as compared, for instance, with that of the teaching faculty), the administrative setup of the parent institution, and the line-and-staff relationships within the library itself. For example, the tables indicate that few head librarians are to be found in any but the largest of the institutions, and that very few institutions pay annual salaries to library personnel on the basis of the 9-to-10 month working year of the majority of faculty members in the same institutions.

The actual salaries of chief librarians on a 11–12 month basis, by type of institution, range from $25,000 to $2,200; the median, from $11,500 to $4,400. On a 9–10 month basis, the corresponding figures are actual salaries, $10,500 to $6,500; median, $7,800 to $3,800.

In both 4- and 2-year institutions (arranged by size of enrollment from "under 500" to "10,000 or more") that pay librarians' salaries on a 11–12 month basis, these salaries steadily increase as the size of enrollment increases.

The questionnaire asked that high, low, and mean salaries for each position be reported. This publication uses only the high figures. Where there were insufficient data to report for a particular type or size of institution, the tables are omitted. The mean and low salaries may be obtained, however, by writing to the College and University Library Specialist, Library Services Branch, Office of Education, Department of Health, Education, and Welfare, Washington 25, D.C.

The number of professional vacancies reported by the libraries is shown in the tabulation below:

Type of institution	*Number of institutions*	*Number of vacancies*

Department and division heads	13	38	2–6	8,400	7,400	7,100	6,600	4,800
Heads of school, college or departmental libraries	3	3	1	5,800	[3]	5,400	[3]	4,700
All other professional assistants	10	49	1–14	7,400	[3]	6,000	[3]	4,700
All nonprofessional assistants	18	112	1–18	5,500	5,000	4,600	4,000	2,400
24 Private Institutions								
Chief librarian or director	21	21	1	18,000	9,300	7,500	6,000	4,400
Assistant or associate librarian	8	8	1	8,900	7,300	6,500	5,000	4,800
Department and division heads	6	16	2–5	7,400	[3]	5,800	[3]	5,300
Heads of school, college or departmental libraries	3	8	2–4	7,500	[3]	6,300	[3]	5,700
All other professional assistants	12	55	1–14	6,500	5,500	4,900	4,600	1,900
All nonprofessional assistants	19	143	1–47	5,200	4,200	3,400	2,700	1,500

[1] From the smallest to the largest number in any institution.
[2] Rounded to nearest hundred.
[3] Too few institutions to warrant calculation.

Table 36. — Range, quartile, and median of high 11–12 month library salary in 125 theological schools in the aggregate United States, by type of position: 1959–60

Position	Number of institutions reporting	Positions		High salary [2]				
		Number	Range [1]	Highest actual	Third quartile	Median	First quartile	Lowest actual
Chief librarian or director	75	75	1	$12,700	$7,300	$5,700	$4,500	$2,200
Assistant or associate librarian	26	28	1–2	6,800	5,200	4,800	4,000	2,300
Department and division heads	13	24	1–6	7,500	6,000	5,300	4,800	3,900
Heads of school, college or departmental libraries	2	2	1	4,500	[3]	[3]	[3]	4,500
All other professional assistants	17	36	1–7	6,000	4,800	4,400	3,600	2,300
All nonprofessional assistants	42	156	1–40	4,600	3,600	3,000	2,400	1,200

[1] From the smallest to the largest number in any institution.
[2] Rounded to nearest hundred.
[3] Too few institutions to warrant calculation.

Table 37. — Range, quartile, and median of high 11–12 month library salary in other professional schools in the aggregate United States Schools, by control and type of position: 1959–60

[.... = zero]

Position	Number of institutions reporting	Positions		High salary [2]				
		Number	Range [1]	Highest actual	Third quartile	Median	First quartile	Lowest actual

Private Institutions							
Under 500	347	87	151	1–6	5,000	1,200	2,800
500–999	219	104	264	1–11	5,100	1,600	2,900
1,000–2,499	187	131	559	1–40	5,200	1,800	3,200
2,500–4,999	37	31	392	1–106	4,900	2,500	3,500
5,000–9,999	39	35	808	3–160	5,500	2,700	4,100
Over 10,000	22	18	1,176	24–249	6,000	3,500	4,000

[1] From the smallest to the largest number in any institution.

[2] Rounded to nearest hundred.

Table 53. — Range and median for 9–10 month salary of chief librarian or library director in 4-year institutions of higher education in the aggregate United States, by enrollment size and control: 1959–60

[.... = zero]

Size of enrollment	Number of institutions		Salary [1]		
	Total	Reporting	Highest	Lowest	Median
Public Institutions					
Under 500	8	8	$9,000	$4,300	$5,800
500–999	10	10	9,700	3,800	7,000
1,000–2,499	32	30	13,500	6,000	8,200
2,500–4,999	12	12	8,900	7,000	7,900
5,000–9,999	4	4	11,500	10,000	10,100
Over 10,000	1	1	[2]	.....	.....
Private Institutions					
Under 500	56	47	7,200	3,500	4,300
500–999	40	30	8,500	3,400	5,100
Over 1,000	12	8	10,500	3,500	5,400

[1] Rounded to nearest hundred.

[2] Since only one institution falls in this category, reporting a figure would reveal an individual's salary.

Table 54. — Range and median for high 9–10 month salary of associate or assistant librarians in 4-year institutions of higher education in the aggregate United States, by enrollment size and control: 1959–60

[.... = zero]

Size of enrollment	Number of institutions		Positions		Salary [2]		
	Total	Reporting	Number	Range [1]	Highest	Lowest	Median

Washington 25, D. C.

COLLEGE AND UNIVERSITY LIBRARY STATISTICS, 1959-60

General Instructions: This report should include data on *all* library agencies of the institution, regardless of location, even if they are not under the general direction of the college librarian. List below any libraries that are *excluded:*

_____ _____ _____

_____ _____ _____

PART 1

The data in Part 1 are for the fiscal year ending _____ 1960.
(month, day)

Note: Please mark estimates with "est."

LIBRARY COLLECTION

1. Number of volumes[1] at end of fiscal year . . . . . _____
2. Number of volumes added during fiscal year[2] . . . . . _____
3. Number of periodicals[3] currently received (excluding duplicates) . . . . . _____

PERSONNEL (Full-time equivalent)[4]

4. Number of professional employees (FTE)[5] . . . . . _____
5. Number of nonprofessional employees (FTE)[6] . . . . . _____
6. Total number of employees (FTE) . . . . . _____
7. Number of hours of student assistance during fiscal year . . . . . _____

1/A volume is any printed, typewritten, mimeographed, or processed work, bound or unbound, that has been cataloged or fully prepared for use. Include microcards, microfilms, microprints, and other forms of microtext.

2/Report *actual* number of volumes acquired; do not subtract volumes withdrawn.

3/A periodical is a publication appearing at regular intervals of less than a year and continuing for an indefinite period.

4/To compute "full-time equivalents" (FTE) of part-time personnel, add the total number of hours worked per week by all part-time personnel of each type and divide by the number of hours in your full-time work week.

5/A professional employee performs work requiring education, training, and skill in the theoretical or scientific aspects of library work as distinct from its merely mechanical and clerical aspects.

6/Clerical and subprofessional, excluding student assistants and maintenance staff.

LIBRARY EXPENDITURES (Include expenditures of all libraries; see general instructions, page 1. Give sums to nearest dollar; *omit cents.*)

8. Salaries (before deductions): Library staff ..... $ _____

9. Wages (before deductions): Student service and other hourly help ..... $ _____

10. Total salaries and wages (items 8 and 9) ..... $ _____

11. Expenditures for books and other library materials[7] ..... $ _____

12. Expenditures for binding ..... $ _____

13. Total for library materials and binding (items 11 and 12) ..... $ _____

14. Other operating expenditures[8] ..... $ _____

15. Total operating expenditures (items 10, 13, and 14) ..... $ _____

INSTITUTIONAL DATA

16. Number of resident students at the campuses included in this report, regular session (fall through spring), 1959-60.[9]

(a) Undergraduate and first professional[10] ..... _____

(b) Graduate[11] ..... _____

(c) Total (items 16a and 16b) ..... _____

17. Total expenditures of institution for educational and general purposes[12] ..... $ _____

DO NOT WRITE IN THIS SPACE

A. OE/TE ..... _____ B. OE/EGE ..... _____

7/Include expenditures for periodicals, serials, pamphlets, and all types of non-book materials.

8/Exclude capital expenditures for buildings, sites, equipment for new buildings or additions, and the costs of building operation and maintenance.

9/Data on enrollment should be obtained from the registrar. The figures should be consistent with the definitions of Items 7c, 8c, and 9 of Schedule III, Form RSH 50-59, "Comprehensive Report on Enrollment (Summer Session and Fall): 1959."

10/Include all resident students: undergraduate, special and unclassified, and "first professional." A *resident student* takes his college work, either day or evening, on the main campus or on a branch campus of the institution, under the instructional staff of the institution.

11/Include students at a level above the bachelor's or first professional degree, and special and unclassified students working primarily at the graduate level.

12/Data on total expenditures of institution for educational and general purposes should be obtained from the comptroller or business officer. The figure should be consistent with the definition of Item E-32 of Schedule II of Form RSS-041(58), "Financial Statistics of Institutions of Higher Education."

PART 2

SALARIES OF FULL-TIME PERSONNEL

Salary data will be listed by institution and also used in summary statistical tabulations. It is important that this information be as complete as possible. If your institution wishes to limit use of the data to statistical analysis, check here ☐.

In the table below, report the number of full-time personnel in each category, and the highest and lowest salaries they actually received *as of September 1, 1960.* Do not report the range of the salary schedule. See general instructions, page 1, with reference to inclusion of all library agencies.

Exclude salaries of personnel who contribute services or are employed on a part-time basis or for less than the full academic year (9-10 months).

When a category has only one salary level, enter it in column 3, "Highest Salary."

18. How long is term of employment? *(Check one.)* 9-10 months ☐ 11-12 months ☐

Position	Number Included	Highest Salary	Lowest Salary	Mean Salary [13]
1	2	3	4	5
19. Chief librarian or director [14]	XXXXXX	$	XXXXXX	XXXXXX
20. Associate or assistant librarian		$	$	$
21. Department and division heads		$	$	$
22. Heads of school, college or departmental libraries		$	$	$
23. All other professional assistants		$	$	$
24. All nonprofessional assistants		$	$	$

25. Beginning salary of a library school graduate without experience . . . . . $ _____

26. Number of budgeted *professional* positions (in full-time equivalents) vacant on September 1, 1960 [15] . . . . . _____

13/The mean (average) salary should be determined by adding individual salaries in a category and dividing by their number.

14/Only one salary should be listed in this category. Salaries of heads of school and college libraries should be listed in item 22, even if their agencies are independent or located at an institutional branch.

15/Enter the full-time equivalent of all professional positions vacant on September 1, 1960 for which funds have been allocated in the library budget.
